## BUILDING PROJECT NAME

### 640 N. Wells - Chicago Multifamily High Rise

#### Architect

Hartshorne Punkard Architecture

#### Developer

JDL

#### Engineering and Design

Quest Engineering / Lend Lease

#### Description

640 North Wells is one of the most anticipated Multifamily High Rise buildings in Chicago. Developer and fund provider JDL responded to PRISMS' Sawcut Texture right away as a unique finish that could enhance the interiors of their building. Hartshorne Punkard Architecture (HPA) encouraged the combination of our Sawcut texture on tightly structured, lineal patterns, Concrete Groovz and Zambukka. This winning combination mirrors the high end contemporary feel of the building. Quest Engineering won the project through Lend Lease and delivered outstanding product on time and on budget.
