- **Location:**
Brampton, Ontario
- **Fabrication:**
Exhibit Solutions Inc.

- **Description:**
EXHIBIT SOLUTIONS was founded on the values of delivering exceptional customer service and quality products. As a design-focused organization primarily serving the trade show and display industry, they consistently push the boundaries of design and engineering. When it came time to renovate their head office, the in-house creative team designed the custom case goods and selected Palomino for its modern, yet timeless design, and its rich texture. The project included a renovation of the private and shared offices, the boardroom, and the copier room. Exhibit Solutions used PRISM TFL WF435 Palomino the boardroom table, office desks, credenzas and cabinets, and the copier room cabinetry. The carpenters worked closely with the design team and leveraged the additional options available through ARAUCO's Design Symmetry program.
