Build America Buy America Manufacturer Certification Letter

Manufacturer Name: Arauco North America, Inc.

To Whom It May Concern:

Arauco North America, Inc. ("ARAUCO") certifies that Arauco MDF Mouldings produced in our U.S. facilities* qualify as "manufactured products" under the Build America Buy America Act (BABAA), as they are made in the United States and contain over 55% domestically sourced components.

MDF substrates are produced by blending wood and binding additives and pressing under heat and pressure. Arauco MDF Mouldings are produced by forming the MDF substrate into decorative patterns and in some cases applying a paint/primer mix to the surface. The wood content of the panels described above is conservatively calculated to be a minimum of 85%. Therefore, the product described above meets the BABAA threshold for inclusion in the project work as a manufactured product.

*Manufacturing locations:

- Moncure, North Carolina
- Malvern, Arkansas

Regards,

Signed by:
