COMPANY AND PRODUCT INFO

Issued to

ARAUCO North America

For the Products

Duraflake FR, VESTA FR Particleboard PRISM TFL

Description

Duraflake Fire-Rated is a UL approved Class A/Class 1 fire-rated particleboard panel. This product is ideal for use in safety code and architectural specified projects such as schools, hospitals, malls, airports, offices and public buildings. This nationally recognized fire-rated panel is classified by Underwriters Laboratories for surface burning characteristics using the UL 723 Test Method. Panels are retardant throughout, stay classified after cutting and have a wide range of sizes available. These panels are made with 100% recycled and/or recovered wood fiber and is an ECC™ (Eco-Certified Composite) sustainably certified product. Also available as VESTA ULEF FR

Assessor

Qualifications

LEED BPDO Credit: Material Ingredients Option 1
Qualifies for as 1 product

LEED BPDO Credit: Material Ingredients Option 2
Qualifies for 100% of cost

MATERIALS / INGREDIENTS INFORMATION

The following table represents the top 99% of the material ingredient disclosure and ratings. For the full ingredient disclosure information, please see the table on the reverse side.

Materials	Results			
	MFG	Install	Use	End of Use
Wood				
MUF Resin	I, D			
UF Resin	I, D			
MF Resin	I, D			
Wax				
Urea				
Boric Acid				
Titanium Dioxide

Exposure Indicator

D = Dermal, Skin
I = Inhalation, air
O = Oral, mouth

*No Indicator means no potential exposure scenario identified

Color Ratings

	Low or no hazard identified and/or potential exposure
	Moderate hazard identified and/or potential exposure
	Higher hazard identified. The combination of the hazard and potential exposure leads to some caution for some uses and/or applications.
	Cannot be fully assessed due to either lack of complete formulation, or lack of toxicological information for one or more ingredients.
	Highly problematic material containing one or more chemicals classified as CMR and having a plausible route of exposure.

Product Lens

a materials health assessment

The below table contains the full assessment report for the product disclosed at 100 ppm.

Material	CAS Number	Role	%					Comment
				MFG	Install	Use	End of Use	
Wood	NA	Structural (Panel) Paper (Laminate)	69%-90%					Typically wood is green in all product use phases, but some wood species can be sensitizing or the dust can be carcinogenic so during the manufacturing phase these woods would be red.
MUF Resin (TFL)	25036-13-9	Panel Resin	5%-12%	I, D				Formaldehyde based resin system. Testing on residual formaldehyde shows levels below 100ppm in finished board. Adhesive may contain free formaldehyde, making red in manufacturing/supply chain but yellow everywhere else.
UF Resin (TFL)	9011-05-6	Laminate Resin	0.49%-13.66%	I, D				Formaldehyde based resin system. Testing on residual formaldehyde shows levels below 100ppm in finished board. Adhesive may contain free formaldehyde, making red in manufacturing/supply chain but yellow everywhere else.
MF Resin	Proprietary	Laminate Resin	0.62-2.08%	I, D				Formaldehyde based resin system. Testing on residual formaldehyde shows levels below 100ppm in finished board. Adhesive may contain free formaldehyde, making red in manufacturing/supply chain but yellow everywhere else.
Wax	64742-61-6	Water Repellant	0%-1.0%					No concerns across any product use phases
Urea	57-13-6	Scavenger	0%-3.0%					No concerns across any product use phases
Boric Acid	10043-35-3	Catalyst	5%-15%					CMR - Repro Tox
Titanium Dioxide	13463-67-7	Laminate Pigment	0.01-0.05%					Inhalation hazard that does not translate to risk due to the encapsulation of the pigment

* TiO2 is only included in pigmented whites

	Low or no hazard identified and/or potential exposure
	Moderate hazard identified and/or potential exposure
	Problematic concern found. The combination of the hazard and potential exposure leads to some caution for some uses and/or applications.
	Cannot be fully assessed due to either lack of complete formulation, or lack of toxicological information for one or more ingredients.
	Highly problematic material containing one or more chemicals classified as CMR and having a plausible route of exposure.
